

Driving Test Routes

What Are .GPX Files

Basically a .GPX file is a text based file that is used on SatNav Devices and SatNav Apps. The most common brands in the field are TomTom and Garmin, although there are lots more. The DVSA use TomTom SatNav devices on the independent driving section of the driving test and as a business we feel that this is the best option to use however there are other choices.

On our website we have a very detailed step-by-step guide on how to use the TomTom GO App, which will work on Android and iOS mobile phones incase you don't own a SatNav Device, [CLICK HERE "HOW TO USE TOMTOM GO"](#) this is the one we recommend.

Here is a link to OsmAnd which is another App that is free to use just click on this link [DOWNLOAD "OSMAND"](#)
